Chapter 2

File Index

2.1 File List

Here is a list of all documented files with brief descriptions:

alloc.c	Essential allocation functions for <i>aztekas</i>	5
array.c	Functions to simplify the index vector access	6
auxfunc.c	Helpful functions for <i>aztekas</i>	6
bound_cond.c	Standard boundary conditions	7
flux.c	Numerical flux computing and implementation	7
input.c	Important input parameters for <i>aztekas</i>	8
integration.c	Main function for the time integration in the conservative variables \mathbf{Q}	8
main.c	Main file of <i>aztekas</i>	9

Chapter 3

File Documentation

3.1 alloc.c File Reference

Essential allocation functions for *aztekas*.

```
#include <stdio.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "main.h"
#include "param.h"
```

3.1.1 *

Functions

- void **allocateArray** ()
- void **new_SIZE** ()

3.1.2 Detailed Description

Essential allocation functions for *aztekas*.

Author

Alejandro Aguayo-Ortiz

3.2 array.c File Reference

Functions to simplify the index vector access.

```
#include <stdio.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "main.h"
#include "param.h"
```

3.2.1 *

Functions

- int **c1** (int n, int i)
- int **c2** (int n, int i, int j)
- int **c3** (int n, int i, int j, int k)

3.2.2 Detailed Description

Functions to simplify the index vector access.

Author

Alejandro Aguayo-Ortiz

In this file we include three functions for passing the standard C notation for a vector:

```
U[i*N_j*N_k + j*N_k + k]
```

to a much simpler notation

```
U[(i,j,k)]
```

3.3 auxfunc.c File Reference

Helpful functions for *aztekas*.

```
#include <stdio.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "main.h"
#include "param.h"
```

3.3.1 *

Functions

- int **MxV** (double *M, double *V, double *L)
- void **roundgen** (double *num)

3.3.2 Detailed Description

Helpful functions for *aztekas*.

Author

Alejandro Aguayo-Ortiz

3.4 bound_cond.c File Reference

Standard boundary conditions.

```
#include <stdio.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "main.h"
#include "param.h"
```

3.4.1 *

Functions

- void **OUTFLOW** (double *B)
- void **REFLECTIVE** (double *B)
- void **PERIODIC** (double *B)

3.4.2 Detailed Description

Standard boundary conditions.

Author

Alejandro Aguayo-Ortiz

3.5 flux.c File Reference

Numerical flux computing and implementation.

```
#include <stdio.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "param.h"
#include "main.h"
```

3.5.1 *

Functions

- int **FLUX1D** (vec_ *v, lim_ *l, int *l)
- int **FLUX2D** (vec_ *v, lim_ *l, int *l)
- int **FLUX3D** (vec_ *v, lim_ *l, int *l)
- int **HLL** (double *F, flx_ *f, int x)
- int **HLLC** (double *F, flx_ *f, int x)

3.5.2 Detailed Description

Numerical flux computing and implementation.

Author

Alejandro Aguayo-Ortiz

3.6 input.c File Reference

Important input parameters for *aztekas*.

```
#include <stdio.h>
#include <omp.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "main.h"
```

3.6.1 *

Functions

- int **read_parameters_file** (char const *paramfile_name)

3.6.2 *

Variables

- FILE * **paramfile**

3.6.3 Detailed Description

Important input parameters for *aztekas*.

Author

Emilio Tejeda

3.7 integration.c File Reference

Main function for the time integration in the conservative variables **Q**.

```
#include <stdio.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "main.h"
#include "vector.h"
```

3.7.1 *

Functions

- int **INTEGRATION** ()

3.7.2 Detailed Description

Main function for the time integration in the conservative variables \mathbf{Q} .

Author

Alejandro Aguayo-Ortiz

3.8 main.c File Reference

Main file of aztekas.

```
#include <stdio.h>
#include <omp.h>
#include <math.h>
#include <stdlib.h>
#include <string.h>
#include "main.h"
#include "param.h"
```

3.8.1 *

Functions

- int **main** (int argc, char *argv[])

3.8.2 Detailed Description

Main file of aztekas.

Author

Alejandro Aguayo-Ortiz.
